

EUROCK
FOR THE EVERYDAY HERO™

INDUSTRIAL SAFETY FOOTWEAR
COLLECTION 2021

ABOUT EURO SAFETY SOLUTIONS

Euro Safety Solutions is India's fastest-growing and the Most Promising supplier of head-to-toe Personal Protective Equipment (PPE). Stemming out of the renowned Euro Safety Group, we are committed to providing the best safety solutions to the Indian workforce. Euro Safety Solutions is incepted with the vision of providing India with end-to-end industrial safety equipment and workwear as per international quality & safety norms. Euro Safety Solutions aims at providing PPE in a more efficient, coordinated, and customised manner to the industry to further minimise their efforts and inconveniences.

THE EUROCK VISION

Admired, Affordable & Accessible range of Safety Footwear, especially curated for the Indian workforce. EUROCK range is designed & developed by one of Asia's largest PPE manufacturers in accordance to all Indian & International safety norms.

EUROCK's vision is to protect *The Everyday Hero* without compromising on the product, quality & testing.

PRODUCT, QUALITY & TESTING

Manufactured in an ISO 9001 & SA 8000 certified facility, every pair of EUROCK is tested by our highly equipped in-house testing lab in collaboration with international labs against **EN ISO 20345 & IS 15298 norms**.

Every pair undergoes rigorous quality checks at multiple stages during production to ensure that the customer receives a state-of-the-art engineered pair of the shoe – EUROCK

APPLICABLE INDUSTRIES

EUROSAFE™ SOLE ENGINEERING

1 Ultimate SHOCK Absorption

EUROCK outsoles have dynamic shock capturing characteristics. The unique design helps to naturally divide the heel energy to actively reduce fatigue and create a comfortable experience all day long.

2 STABILITY Enhancing Design

The outsole is engineered to provide optimum support to the wearer on scaffolds & ladders. The outsole's anti-skid properties and specialised heel increase the stability of the wearer.

3 SELF-CLEANING Cleats

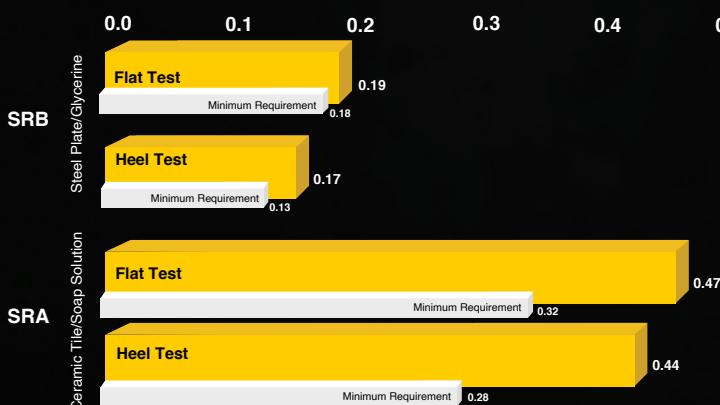

The specialised *Cleat Technology* allows the outsole to self-clean in order to avoid accumulation of any dirt & grit that may tamper with the slip resistance properties of the safety footwear.

4 ANTI-SKID Tread Design

EUROCK outsoles have uniquely designed treads with sandy texture in the center & ribbed texture at the front where there is maximum force. This design allows the footwear to maximise the coefficient of friction, thus resulting in an increased grip & slip resistance.

Certified SLIP RESISTANCE

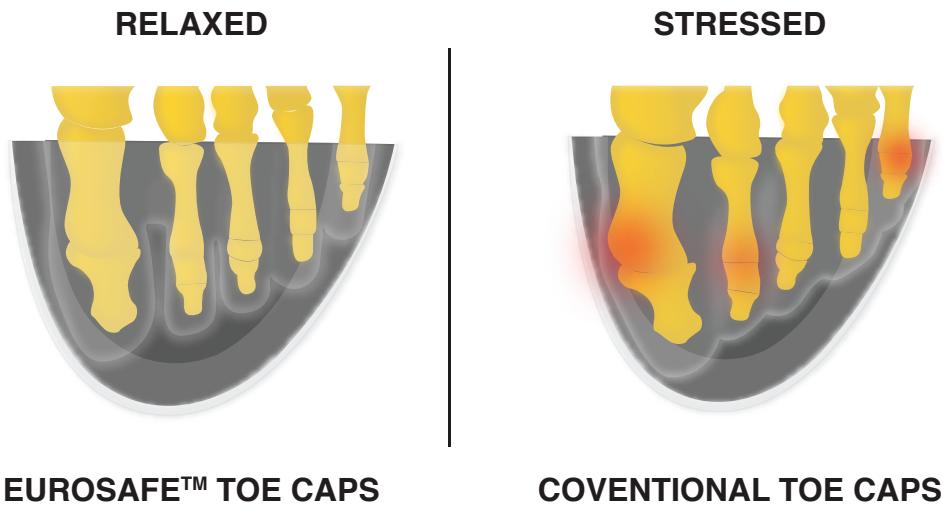

The mould and outsoles are engineered not only to meet the SRC requirements but also to surpass the minimum standard requirements of SRA and SRB. The outcome of all tests exceeds the minimum requirements remarkably.

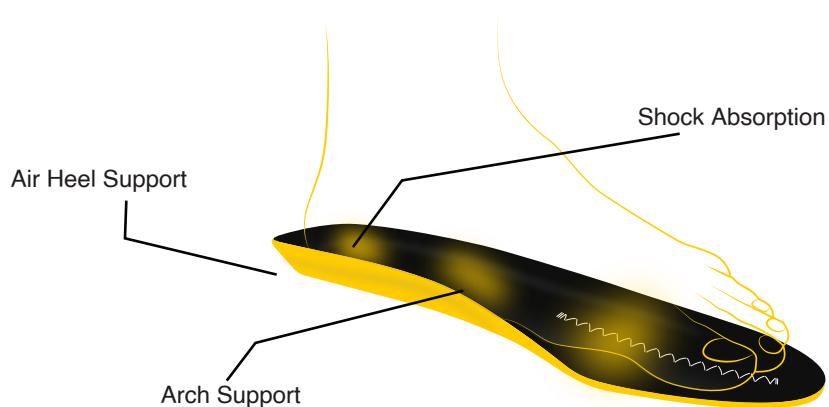

EUROSAFE™ TOE CAP TECHNOLOGY

EUROCK is equipped with EUROSATE™ toe caps. These stainless steel toe caps are specially designed keeping in mind the foot form of an average Indian worker. EUROSATE™ toe caps have a wider profile as compared to the other toe caps in the market resulting in a more comfortable working experience.

EUROSAFE™ COMFORTABLE INSOCK

The new and revolutionary EUROSATE™ comfortable insock takes full-surface foot support to the next level. The unique shape constantly adapts to the pressure of the foot, improving every step. With the additional arch support, wearer's feet are kept stable and less vulnerable to injuries. The exceptional breathability manages the in-shoe climate, keeping the wearer's feet dry and healthy. EUROCK with EUROSATE™ insocks keep your feet comfortable and fresh all day long.
